

ULTRA-DRI GOLD

Absorbent, Dry Multi-species Disinfectant Powder

Features:

- Bedding powder.
- Designed for use in calving and lambing pens.
- Contains a fast acting, broad spectrum, DEFRA approved disinfectant.
- Non-caustic & doesn't dry or damage the cows' skin.
- Acts as a powerful 'drying' agent on the bedding in straw yards and on cubicles.

- Effective against bacteria, viruses & fungi.
- Remains active for up to 1 week.
- Absorbs moisture to help keep beds dry.
- Reduces ammonia.
- Non-irritant- contrary to lime, Ultra-Dri Gold doesn't burn.

Benefits:

- Effectively kills most pathogens within 5 mins.
- Continues working from day to day to provide effective control of bacteria.
- Improves general hygiene of cubicles and bedded pens.
- Perfect when faced with severe outbreaks of mastitis, very high somatic cell counts and other challenging situations.

Where to use:

- Can be used for all classes of livestock including pigs, poultry, sheep & horses.
- Can be used as a dairy cubicle bedding powder, on straw yards, calving boxes, calf pens & dry powder footbaths.

ULTRA-DRI GOLD

How to use:

- Remove soiled bedding, sprinkle Ultra-Dri onto the housing floor before adding clean bedding.
- Ultra-Dri can be applied to clean floors before adding bedding, or can be mixed with bedding product e.g. sawdust or applied on top of bedding.

Application rates:

- For best results apply Ultra-Dri daily or at least 2-3 times per week for dairy cow cubicles, general housing, calving boxes, calf pens and straw yards.
- Cow cubicles: 70g/cubicle/day or 140g every other day. Work on 05.kg/cow/week.
- For general use (loose cattle housing, pig, poultry & equine) use 100g/m.
- Calves: 60-100g/m for calf pens.
- Lambing pens: 50g per animal..
