Bespoke Veterinary Wholesaler

# ULTRA DRI GOLD

**Absorbent, Dry Disinfectant Powder for Poultry/Game**

## ✓ Features

- Bedding powder
- Contains a fast acting, broad spectrum, DEFRA approved disinfectant
- Non-caustic
- Acts as a powerful 'drying' agent on the bedding
- Effective against bacteria, viruses & fungi
- Remains active for up to 1 week
- Absorbs moisture to help keep beds dry
- Reduces ammonia
- Non-irritant; contrary to lime, Ultra-Dri Gold doesn't burn

## ✓ Benefits

- Effectively kills most pathogens within 5 mins
- Continues working from day to day to provide effective control of bacteria
- Improves general hygiene of housing
- The organisms which cause birds to scour are very quickly killed by Ultra Dri
- Secondary infections eg. E-Coli and Salmonella, which strike unwell birds, are also often killed by the same application

## ✓ How to use

- Ultra Dri can be sprinkled by hand or by blower onto any areas where the disease organisms may be and can be used on all types of poultry
- Use weekly for feeders and drinkers – inside and outside.
- Use during movement of birds or if birds are stressed.
- Use in the crucial areas where birds congregate in the release pens.
- Use in passageways and movement areas.

## ✓ Application Rates

- Ultra Dri should always be used at the rate of 100g per sq. m. (i.e. a “good handful” per square yard)
- Apply 2 – 3 times per week or when areas become very wet
