VETERINARY ENDOSCOPES

Discover our range of Italian-made veterinary specific endoscopes

Our range of flexible videoendoscopes are portable and lightweight, suitable for companion animal and equine practice. Designed and manufactured in Italy, this range of veterinary scopes has evolved from years of human, veterinary and industry endoscopic production. The range includes an equine dynamic airway scope and an equine gastroscope.

No cumbersome processors or light sources required. Simply connect your Android or Windows smart device and the resulting high resolution image will take your examination, diagnoses and treatment to the next level. Note that the scopes can be customised to your preferences allowing for a truly bespoke piece of kit. For customisation enquiries please contact us directly.

Equine & Small Animal Endoscope (9.8mm)

An essential bit of kit for the equine practitioner, this endoscope can also be used in larger small animals for diagnostics and treatment. The scope system is fully portable and the HD image quality and ease of use make this scope the perfect companion for therapeutics and diagnostics on the road and in the clinic. The vascular enhancement feature is ideal for assessing guttural pouches. 4 way angulation.

Equine Gastroscope (9.8mm)

Our HD gastroscope is fully portable and lightweight. The scope connects to Android tablet, Windows laptop or desktop, medical monitor or smartphone, making gastroscopy on the road a breeze. The 9.8mm outer diameter makes it easy to pass, comfortably fitting inside a stomach tube if required. 4 way angulation, 2 flush channels and a working length of 3200mm, comes complete with a battery powered pump. This set up is easy to use and can be truly ambulatory.

Slim Endoscope (7.8mm)

This slim adaptable endoscope is ideal for small animal, mixed or equine practices. It's 4 way angulation combined with its versatile dimensions allow a wide range of diagnostic work ups in small animals as well as equine respiratory examination and therapeutics. The super slim diameter makes it the perfect choice for your smallest equine patient including foals and minis.

Thin Endoscope (4.4mm)

Versatile small animal, high definition videoendoscope. Suitable for small animal gastroscopy, bronchoscopy, cystoscopy and vaginoscopy (depending on breed size.) Popular for upper airway assessment and treatment. Outer diameter 4.4mm with an operating channel of 2.2mm. 2 way angulation.

Ultra-thin (2.8mm)

Our smallest diameter videoendoscope which can be used in your smallest and most exotic patients. Super thin 2.8mm outer diameter with an operating channel of 2.2mm. Working length of 850mm with a 2 way angulation. Providing high definition imagery and a working channel allowing both diagnostic and therapeutic use. Ideal for a wide range of small animal applications including rhinoscopy, otoscopy, bronchoscopy and cystoscopy. It can also be used for sinoscopy in the equine patient.

Equine Dynamic Airway Endoscope

Our dynamic video endoscope is a lightweight, high-performance diagnostic tool that uses the most advanced technology available on the market. Full HD resolution ensures your images are always of the best quality, whilst the remote and automatic flush ensures a clear view regardless of gallop speed. The system is simple to use and fit, with a saddle pad and leather bridle. The use of a smartphone allows sharing of the examination in real time, as well as easily sharing saved clips. Videos can be practice, patient and location (GPS) stamped. Statistics: 9.8mm diameter, 1050mm length and a weight of just 1140g (including wash pump and connecting cable).

Introducing Alpha2EQ

Orthobiologic product treating equine lameness, joint inflammation, soft tissue injury and airway inflammation through AlphaActive filtration technology. Now available exclusively in the UK through MerlinVet UK.

Key Benefits

- Two-step centrifugation process functionally isolates the alpha-2-macroglobulin from the horse's own blood
- Powered by patented AlphaActive filtration technology
- Autologous & drug-free
- Versatile for horses in all disciplines - from performance to older horses
- Laminitis-risk free
- Easy on-site processing
- Freezable for up to 12 months
- No competition withdrawal time
- Multi-dose kit suitable for multiple joints in one session
- Observed results – clinical improvement often seen in 7 days, with effects lasting 6–12 months

What is Alpha2EQ?

Alpha2EQ is a drug-free orthobiologic treatment designed to reduce inflammation and support healing in horses. Alpha2EQ isolates a powerful, naturally occurring anti-inflammatory protein called **alpha-2-macroglobulin (α2M)** from the horse's own blood using the patented **AlphaActive filtration process**, to help manage joint pain, soft tissue injuries, and airway inflammation at the source.

The AlphaActive process separates the plasma, then filters and functionally isolates the protein, alpha-2-macroglobulin, a powerful inhibitor of cartilage catabolic factors. When injected or applied to areas of inflammation, alpha-2-macroglobulin removes the damage-causing enzymes to help improve the healing process and protect against further damage. This includes slowing the progression of osteoarthritis by preventing cartilage breakdown and loss.

What Conditions Can Alpha2EQ Help Treat?

Alpha2EQ supports the healing of many inflammatory and degenerative conditions, including:

- Osteoarthritis
- Tendon injuries
- Ligament injuries including suspensory injuries
- Synovitis and bursitis
- Airway inflammation (e.g. equine asthma)
- SI dysfunction
- Prophylactic joint management in performance horses

Common treatment areas include:

Coffin joint, hock, stifle, navicular bursa, suspensory branch, cervical facets, SI joint and more.

How Does It Work?

α 2M is a large glycoprotein found in the bloodstream. It binds and neutralizes destructive enzymes responsible for cartilage breakdown, joint pain, and inflammation. Due to its size, α 2M cannot always reach the areas where it's needed most. **Alpha2EQ solves this by concentrating and delivering α 2M directly to affected tissues**, promoting healing and protecting against further damage.

The patented **AlphaActive filtration process functionally isolates α 2M through a two-step centrifugation and filtration method** to concentrate and isolate α 2M from a small sample of whole blood. This results in a highly purified product that targets inflammation at the source. Unlike other plasma-based products, Alpha2EQ selectively removes harmful plasma proteins, delivering a cleaner, more targeted formulation.

Once isolated, α 2M can be injected intra-articularly or applied to affected areas of inflammation to remove damage-causing enzymes and reduce inflammation, improve the healing process and protect against further damage.

How long does Alpha2EQ last?

In most cases, the results of the treatment can be observed within a few days of the procedure and may have long-lasting effects of 6-12 months. Sometimes a series of injections may be needed. Prophylactic use as a chondroprotectant is recommended.

Products Available Through MerlinVet UK

- Alpha2EQ Centrifuge
- Alpha2EQ Centrifuge Conversion Kit
- Alpha2EQ 15ml
- Alpha2EQ 30ml
- Alpha2EQ Travel Case
- Centrifuge Counter Balance
- Flexineb Nebulizer - Complete Kit

sidekick DIAGNOSTICS

The most advanced handheld diagnostic device available - bringing high tech diagnostics to the horse's side

sidekick is a horse-side blood testing device giving fast & reliable results in minutes

- Handheld, portable and designed for life on the road
- Accurate & rapid results: quantitative results within 5 minutes allowing for diagnosis & immediate intervention
- Smart-Calibrate™ enables automatic batch code reading
- No faff, no refrigeration and no lengthy delays waiting for lab results when time is of the essence
- Superpowered rechargeable battery via USB-C port
- Keep, share and review all results from the sidekick App

Multitest Capability

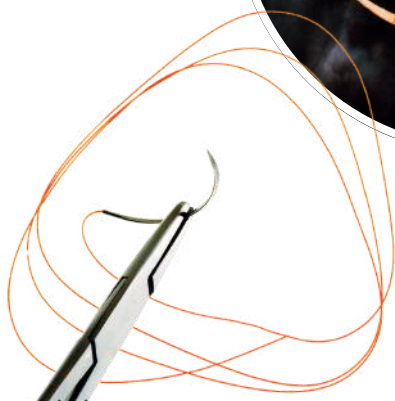

✓ Foal IgG test

✓ Progesterone testing

✓ ACTH testing

SILVERGLIDE SUTURES

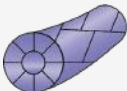

SilverGlide produce a comprehensive range of premium quality sutures, specifically designed for the veterinary market. All the sutures are produced with a high quality, swaged on needle in an individual, sterile pack. SilverGlide sutures are manufactured by a family-run business in Australia, who have been operating for more than 30 years.

Exclusively available through MerlinVet UK, FluroGlide™ from SilverGlide™, is a super smooth, vivid orange, non-absorbable PVDF suture which provides outstanding contrast against all shades of skin, fur, and hair.

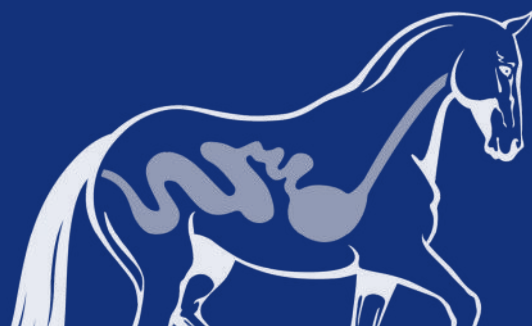

PVDF is a totally inert, flexible, strong-walled, non-absorbable monofilament suture material, with the following features:

- Ultra High Visibility
- Easy Handling
- Vivid Orange
- Very low memory
- Non-absorbable
- Unwetted by blood
- Superior knot security - knots securely in just three throws

NON-ABSORBABLE	MATERIAL DESCRIPTION		QUALITIES	
FLUROGLIDE™ POLYVINYLIDENE FLUORIDE PVDF		Bright orange Monofilament	Ultra high visibility; totally inert; unwet by blood; excellent knot security	
ABSORBABLE	MATERIAL DESCRIPTION		BSR PROFILE	MASS ABSORPTION
POLYGLYCOLIC ACID		Braided violet	In vivo strength retention: 65% at 14 days 20% at 21 days	Essentially complete between 3-6 months
POLYDIOXANONE		Monofilament purple	In vivo strength retention: 80-90% at 14 days 60-80% at 28 days 50-80% at 42 days	Essentially complete between 6-9 months

To view the full SilverGlide range, please visit the MerlinVet UK website.

RELYNEGI: GASTRIC SUPPORT

relyne^{GI}®

Recommended and used by equine vets and professional riders, RelyneGI is the choice for natural gastric support. Maintaining peak performance in the equine athlete has never been easier.

- **Supports healthy digestion:** RelyneGI offers long-term support for all horses in maintaining normal gastric function and promoting well-being in equine athletes
- **100% natural formula** of hyaluronic acid and beta glucan
- Made with TBG-136™ Schizophyllan, an immune-boosting Beta Glucan that stimulates the immune system to **work on targeted areas of the horse's stomach**
- The high molecular weight hyaluronan **coats and protects the stomach's lining**
- **Odourless and tasteless** for adding to feed
- **Developed by world's leading veterinary scientists** at Hagyard Equine Medical Institute
- Relyne has been thoroughly **tested for banned substances** and is **Clean Sport Approved** for horses in competition

Relyne aids in promoting gastric well-being in horses that may not respond to traditional therapies. Relyne is safe for continuous daily use while promoting healthy stomach pH and digestion. It does not alter gastric pH like PPIs and H2 blockers and therefore does not affect digestion and nutrient absorption. Ideal for long-term use in horses with risk factors for gastric discomfort, Relyne can be used in conjunction with other gastroprotectants, medications and supplements, making it an ideal choice for challenging cases.

EQUINE AMERICA

Presenting the new VET ONLY range of products from Equine America

Haemo-Tonic Solution 1L Vet Strength

Targeted nutrition to support post-viral recovery as a pick-me-up. Also suitable for horses needing support for energy levels.

- Contains: high levels of B vitamins (B1, B2, B6, B12, Folic Acid, Niacinamide, Pantothenic Acid); antioxidants including Vitamin E, Milk Thistle, Dry Grape Extract and Seabuckthorn Oil; key trace elements (Copper, Zinc and Selenium); echinacea to support immune function.
- Iron-free formulation, making it safe and suitable for horses with compromised liver function. Enriched with honey, making it palatable even for those with a reduced appetite.
- BETA NOPS and UFAS accredited, making Haemo-Tonic suitable for horses competing under FEI regulations and the Rules of Racing by reducing the risk of our products containing prohibited substances.

Corta-Vet-Flex Vet Strength

Supports joint health, mobility and comfort.

- Key chondroprotective ingredients include Glucosamine (from Glucosamine HCl and N-Acetyl-D-Glucosamine), Chondroitin, Hyaluronic Acid with potent 7000mg Boswellia per service to support horses' natural anti-inflammatory processes, as well as MSM and Omega 3 Fatty Acids from linseed. Vitamin C and Collagen for soft tissue (tendon and ligament) support.
- Key trace elements for musculoskeletal support (Copper, Zinc, Manganese and Selenium).
- BETA NOPS and UFAS accredited, making Corta-Vet-Flex suitable for horses competing under FEI regulations and the Rules of Racing.

Cortavet Solution 1L

Supports joint, tendon and ligament health.

- A unique combination of Collagen, key Amino Acids, Hyaluronic Acid and Trace Elements, delivering the important nutritional building blocks to support joint, tendon and ligament health.
- Contains high AKBA (78%) Boswellia with MSM to support the horses' natural anti-inflammatory processes, helping to maintain joint and muscle comfort and high levels of Collagen (1650mg per serve) to support cartilage and soft tissues (tendon and ligament).
- High levels of Hyaluronic Acid (high molecular weight) at 150mg per serve, a key glycosaminoglycan to support synovial fluid viscosity.
- BETA NOPS and UFAS accredited, making CortaVet Solution suitable for horses competing under FEI regulations and the Rules of Racing.

Liver Support Powder

Nutritional support for the liver with extensive ingredients including milk thistle, natural RRR Vitamin E and B Vitamins, mycotoxin binder and antioxidants.

- Milk Thistle and other antioxidants including Dry Grape and Rosemary Extracts, as well as Vitamins including B complex, Natural RRR Vitamin E, Vitamins A, D and K.
- Mycotoxin binder. Prebiotic, Fructo-Oligosaccharides (FOS) from Chicory.
- BETA NOPS and UFAS accredited, making Liver Support Powder suitable for horses competing under FEI regulations and the Rules of Racing.

Equine Inflamex Powder – Vet Strength

Supports mobility, musculoskeletal comfort and supports the horse's own anti-inflammatory systems.

- High levels of Boswellia (7000mg per serve) and MSM (5000mg per serve) to support the horses' own anti-inflammatory systems. Includes ASU (Avacado Soyabean Unsaponifiables) at 3000mg per serve to support the anti-inflammatory systems and cartilage health.
- Contains key antioxidants Vitamins E and C as well as potent plant-based antioxidants, including Rosemary, Grape Extract, Turmeric, Yucca, Ginger and Ginseng.
- Targeted nutrition for horses requiring anti-inflammatory support and antioxidants. Ideal for hard-working performance horse, as well as the older horse with wear and tear.
- Key trace elements for musculoskeletal support (Copper, Zinc, Manganese and Selenium).
- BETA NOPS and UFAS accredited, making Equine Inflamex Powder suitable for horses competing under FEI regulations and the Rules of Racing.

Opti-Biome – Vet Strength

A unique formulation of prebiotics, probiotics and postbiotics.

- Contains Postbiotics which have been shown to support immune function and digestive health, as well as helping to manage stress. Probiotic - from live *saccharomyces cerevisiae* yeast to support the microbiome and confer a health benefit to the horse. Prebiotic - from shortchain fructo-oligosaccharides (FOS), to support a healthy microbiota, especially during times of stress and diet change.
- Targeted nutrition to support the horse during times of digestive disturbance, antibiotic treatment, stress or illness, as well as support the performance and competition horse. ASU (Avacado Soyabean Unsaponifiables) at 3000mg per serve to support the anti-inflammatory systems and cartilage health.
- BETA NOPS and UFAS accredited, making Opti-Biome suitable for horses competing under FEI regulations and the Rules of Racing by reducing the risk of our products containing prohibited substances.

Pro-Vet Sponge

Intestinal Clay Adsorbent with Probiotic.

- High level (80%) of bentonite (a natural clay mycotoxin binder) to support horses during digestive disturbances, encourage the formation of normal droppings and help absorb free faecal water. Contains probiotics, to help restore a healthy microbiome.
- Mannan oligosaccharide (MOS) helps to maintain the intestinal integrity and the digestive and absorptive function of the gut. Aniseed and Fenugreek flavour to ensure palatability allowing direct addition to feed, or can be mixed with water to administer by syringe or stomach tube (by veterinary surgeon).
- Suitable for foals. BETA NOPS and UFAS accredited, making Pro-Vet Sponge suitable for horses competing under FEI regulations and the Rules of Racing by reducing the risk of our products containing prohibited substances.

Myo-E 5000 Powder 1.5kg

Natural RRR Vitamin E with Selenium & Antioxidants - nutrition for muscle health & recovery.

- High levels of Vitamin E to give a total 5000mg (5620iu) per 50g serve (from natural RRR Tocopheryl and All-Rac-Alpha-Tocopherol Acetate). Controlled levels of Selenium from chelated and inorganic sources (total 0.45mg per serve) with potent plant-based antioxidants, Melon Pulp (a natural source of superoxide dismutase/SOD), Dry Grape Extract and Rosemary Extract.
- Added essential limiting Amino Acids, Lysine, Methionine and Threonine. On a palatable Linseed and Alfalfa base.
- BETA NOPS and UFAS accredited, making Myo-E 5000 suitable for horses competing under FEI regulations and the Rules of Racing.

Comprehensive Lamigard Pellet 7.5kg

Comprehensive formulation to meet daily essential vitamin and trace mineral requirements, plus additional hoof, digestive, metabolic and antioxidant support without extra calories, making it ideal for those on a restricted diet.

- High specification palatable pellet containing broad spectrum of vitamins, minerals, trace elements and essential amino acids. Prebiotics, probiotics and postbiotics to support digestive health and wellbeing with added support for the horses' anti-inflammatory processes from Boswellia and MSM.
- Extensive potent antioxidants including Vitamin E, Melon Pulp, Dry Grape Extract and Rosemary Extract. Support for the hoof with key ingredients Biotin (20mg per 250g serve), Methionine, Zinc, Copper and Calcium.
- Nutritional support for the endocrine and metabolic system including a natural source of Chromium from Cinnamon. Low sugar and starch.
- BETA NOPS and UFAS accredited, making Comprehensive Lamigard Pellets suitable for horses competing under FEI regulations and the Rules of Racing.

MERLINVET UK

Bespoke Veterinary Wholesaler

MerlinVet UK is a specialist wholesaler with expertise in sourcing hard to find products from across the globe. We offer a customised pharmaceutical service, importing pharmaceuticals, equine products and farm fertility equipment to UK vets.

MERLINVET-CEL

Veterinary Buying Group

We are the country's oldest veterinary buying group providing support for independent veterinary practices of all sizes across the UK and improving businesses' profitability through competitive rebates and reduced administration costs.

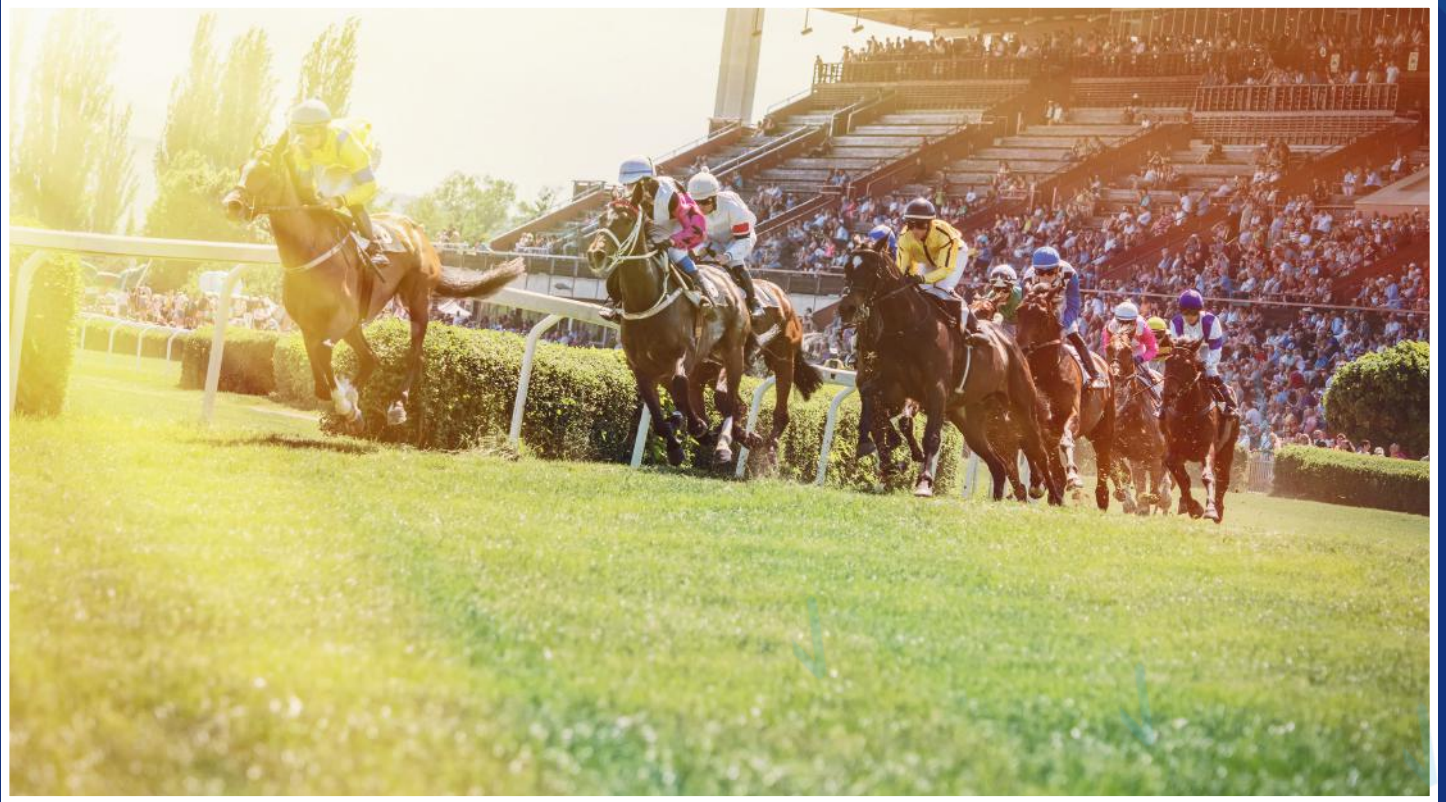

TALON

Talon from MerlinVet provides bespoke health plan solutions for your practice with easy to understand set pricing and optional home delivery of prescription products via our MerlinVet UK warehouse.

Across MerlinVet Group, by listening to the needs of vets, we provide products, services, solutions, and the support needed to add a touch of animal magic to your practice. Visit the MerlinVet Group website to find out more: merlinvetgroup.com
