MerlinVet's Sponsored Rider, Samantha Lissington, who achieved a world & historical record by becoming the first to ever achieve the historic triple by finishing 1st, 2nd and 3rd in a CCI4*L at the Royal Jump in 2025.

MerlinVet UK is a specialist wholesaler with expertise in sourcing hard to find products from across the globe. We offer a customised pharmaceutical service, importing veterinary products for UK vets. By vets, for vets, we are here to help with any equine enquiry. This brochure showcases a selection of our products; to shop our full equine range please visit: merlinvetuk.co.uk

ALPHA2EQ[®]

The original Alpha-2-macroglobulin biologic treating equine lameness, joint inflammation, soft tissue injury and airway inflammation through AlphaActive filtration technology.

Key Benefits

- Two-step centrifugation process functionally isolates the alpha-2-macroglobulin from the horse's own blood
- Powered by patented AlphaActive filtration technology
- Autologous & drug-free
- Versatile for horses in all disciplines - from performance to older horses
- Laminitis-risk free
- Easy on-site processing
- Freezable for up to 12 months
- No competition withdrawal time
- Multi-dose kit suitable for multiple joints in one session
- Observed results – clinical improvement often seen in 7 days, with effects lasting 6–12 months

Alpha2EQ is a drug-free orthobiologic treatment designed to reduce inflammation and support healing in horses. Alpha2EQ isolates a powerful, naturally occurring anti-inflammatory protein called **alpha-2-macroglobulin (α 2M)** from the horse's own blood using the patented **AlphaActive filtration process**, to help manage joint pain, soft tissue injuries, and airway inflammation at the source.

Now available exclusively in the UK through MerlinVet UK.

SilverGlide™

Specialising in Wound Closure

SilverGlide produce a comprehensive range of premium quality sutures, specifically designed for the veterinary market. All the sutures are produced with a high quality, swaged on needle in an individual, sterile pack. SilverGlide sutures are manufactured by a family-run business in Australia, who have been operating for more than 30 years.

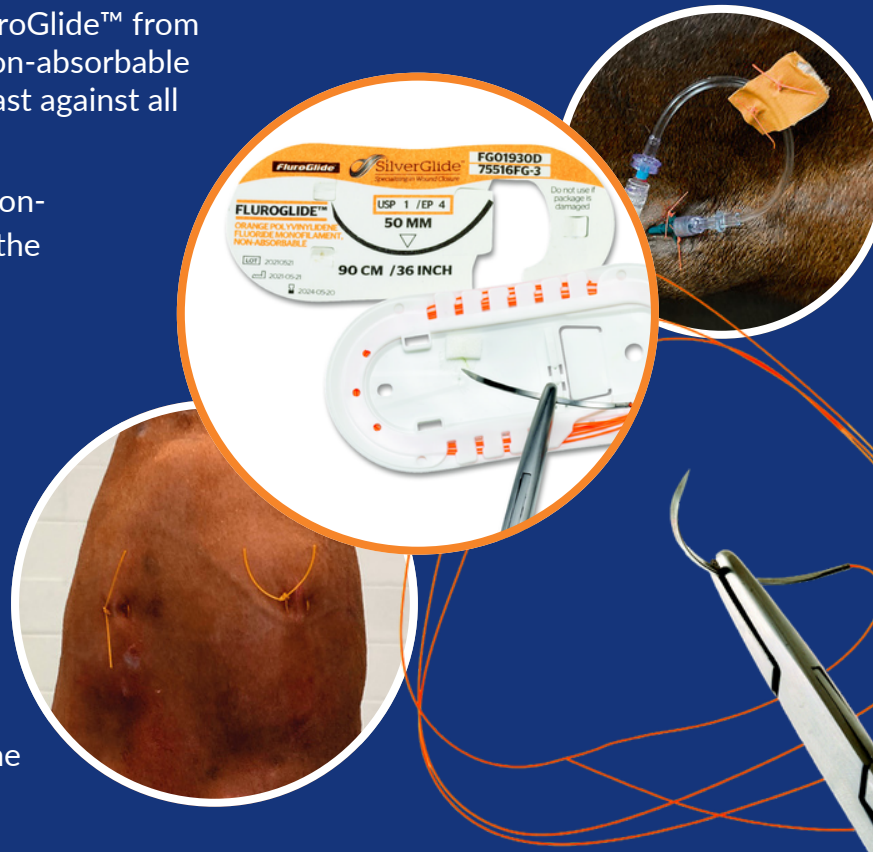

NON-ABSORBABLE	MATERIAL DESCRIPTION		QUALITIES	
FLUROGLIDE™ POLYVINYLIDENE FLUORIDE PVDF		Bright orange Monofilament	Ultra high visibility; totally inert; unwet by blood; excellent knot security	
ABSORBABLE	MATERIAL DESCRIPTION		BSR PROFILE	MASS ABSORPTION
POLYGLYCOLIC ACID		Braided violet	In vivo strength retention: 65% at 14 days 20% at 21 days	Essentially complete between 3-6 months
POLYDIOXANONE		Monofilament purple	In vivo strength retention: 80-90% at 14 days 60-80% at 28 days 50-80% at 42 days	Essentially complete between 6-9 months

Exclusively available through MerlinVet UK, FluroGlide™ from SilverGlide™, is a super smooth, vivid orange, non-absorbable PVDF suture which provides outstanding contrast against all shades of skin, fur, and hair.

PVDF is a totally inert, flexible, strong-walled, non-absorbable monofilament suture material, with the following features:

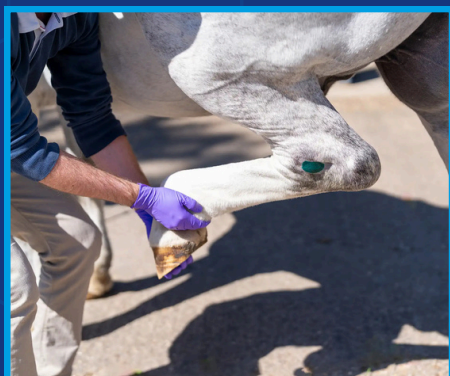

- Ultra high visibility
- Easy handling
- Vivid orange
- Very low memory
- Non-absorbable
- Unwetted by blood
- Superior knot security - knots securely in just three throws

To view the full SilverGlide range, please visit the MerlinVet UK website.

CUVESTREQUIN™

Cuvestrequin is an intelligent gel barrier dressing designed to help manage equine broken or irritated skin. It's a suitable alternative to conventional bandages used to support the management of wounds.

Founded in science at the University of Cambridge and with extensive field studies, the innovative Cuvestrequin gel barrier is easy and safe to use and may be considered as an alternative to topical antimicrobials.

A thin layer of the intelligent gel barrier protects broken skin where bandaging is difficult or not an option on certain areas of the body. As the site progresses, Cuvestrequin can also be a valuable tool for ongoing protection or if bandaging must be stopped.

- Keeps Horses Comfortable and Active
- Saves Time, Waste and Money
- Easy and Safe for Horse Owners to Apply
- Effective Where Bandaging is Not an Option

Cuvestrequin has been tested in over 100 horses across a diverse range of scenarios, from kick injuries to surgical procedures. Vets have reported significant practical benefits, especially where traditional bandaging was impractical or ineffective. It can be used for:

- Kick injuries
- Barbed wire lacerations
- Hock injuries
- Post-staple or suture
- Post-surgical removal
- Chronic, non-healing sites
- Facial and tail application
- Protection for wet irritated skin

Relyne GI: Gastric Support

- Supports healthy digestion: Relyne GI offers long-term support for all horses in maintaining normal gastric function and promoting well-being in equine athletes.
- 100% natural formula of hyaluronic acid and TBG-136™ Schizophyllan, an immune-boosting Beta Glucan that stimulates the immune system to work on targeted areas of the horse's stomach.
- The high molecular weight hyaluronan coats and protects the stomach's lining; odourless and tasteless for adding to feed.
- Relyne GI is safe for continuous daily use. It does not alter gastric pH like PPIs and H2 blockers and therefore does not affect digestion and nutrient absorption.

Relyte HA Electrolyte Gel

- Relyte HA is a balanced equine electrolyte that replenishes the minerals lost in sweat, provides added calcium, and supports gastrointestinal comfort with the addition of hyaluronan (HA).
- Relyte HA from Resolvat comes in an easy to administer dial-a-dose® syringe - contains two doses per tube for adult horses with each 30ml dose being the equivalent to a half litre of sweat.
- Suitable for foals and adult horses, but especially beneficial for horses with a history of gastric ulcers; apple flavoured for palatability without any sugar.
- Can be given to horses with diarrhoea to replenish electrolytes & support gastrointestinal mucosal tissues.

Relieve Digestive Paste

- Relieve by Resolvat restores digestive balance fast with medical grade ultra-purified bentonite clay and L-glutamine in horses.
- Relieve contains the only ultra-purified bentonite clay available in veterinary medicine, offering a superior surface area of particle for adsorption. This facilitates a rapid restoration of digestive balance, whilst L-glutamine, an amino acid that optimizes GI mucosal health, ensures horses bounce back from digestive upset.

The most advanced handheld diagnostic device available - bringing high tech diagnostics to the horse's side

sidekick is a horse-side blood testing device giving fast & reliable results in minutes

- Handheld, portable and designed for life on the road
- Accurate & rapid results: quantitative results within 5 minutes allowing for diagnosis & immediate intervention
- Smart-Calibrate™ enables automatic batch code reading
- No faff, no refrigeration and no lengthy delays waiting for lab results when time is of the essence
- Superpowered rechargeable battery via USB-C port
- Keep, share and review all results from the **sidekick** App
- Multitest Capability: Foal IgG Test; Progesterone Testing; ACTH Testing (coming soon)
